Powerful and flexible

Hitachi EHV+ Series

Core of the new powerful general purpose EHV+ CPU series is the CODESYS V3 runtime system. The result is an open and flexible system which is completed through utilising existing EH-150 modules.

Memory capacity

- User program (RAM) up to 2048 kByte
- Boot project (FLASH) up to 2048 kByte
- Source file (FLASH) up to 5 MByte
- Data memory 512 kByte

Communication interfaces

- Ethernet (10BASE-T/100BASE-TX)
- USB interface (Ver. 2.0 Full speed 12 Mbps)
- Serial interface (RS-232C/RS-422/RS-485)

Programming

- Communication protocol CODESYS V3
- Programming languages according to IEC 61131-3: LD, IL, FBD, ST, SFC + CFC

Communication protocols

- Modbus TCP Client/Server
- Modbus RTU Master
- EtherCAT Master

Power module

CPU module

I/O module

EHV+ CPU module is supporting the EtherCAT master function. It is possible to control up to 11472 bytes I/O (Input 5736 bytes, Output 5736 bytes).

EHV+ CPU module

The new EHV+ series consists of 2 powerful CPUs. The models differ through memory capacities (512, 2048 kByte) whilst maintaining a consistently high performance. The EHV+ CPU is compatible with a variety of open networks through use of the onboard Ethernet interface.

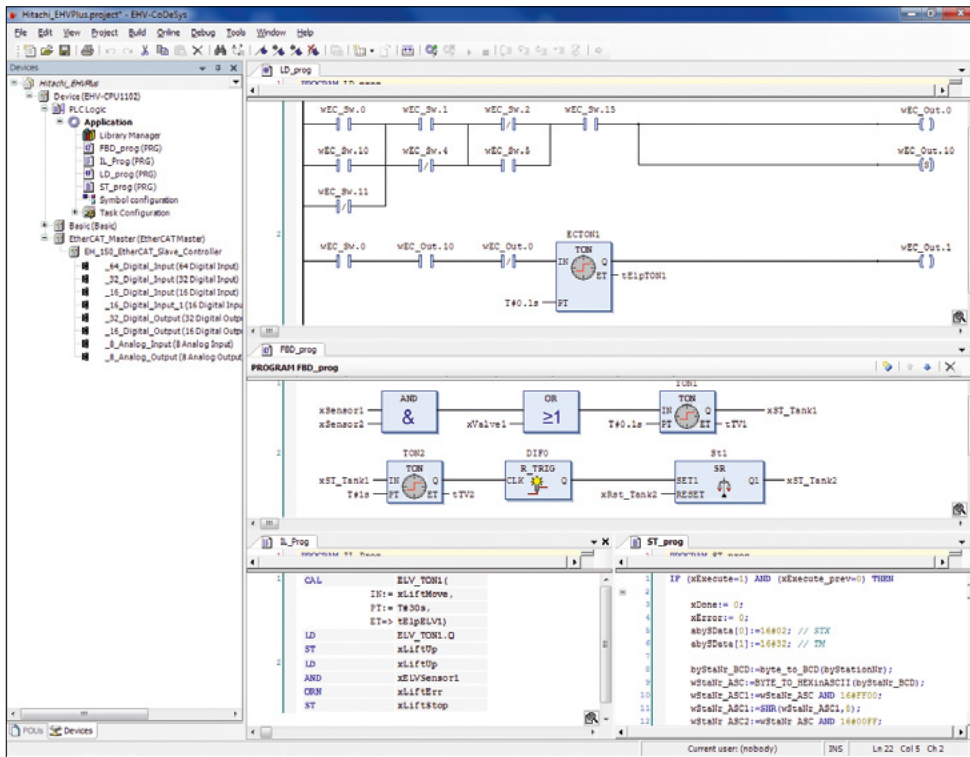

Max. 255 slave controllers

Easy and efficient

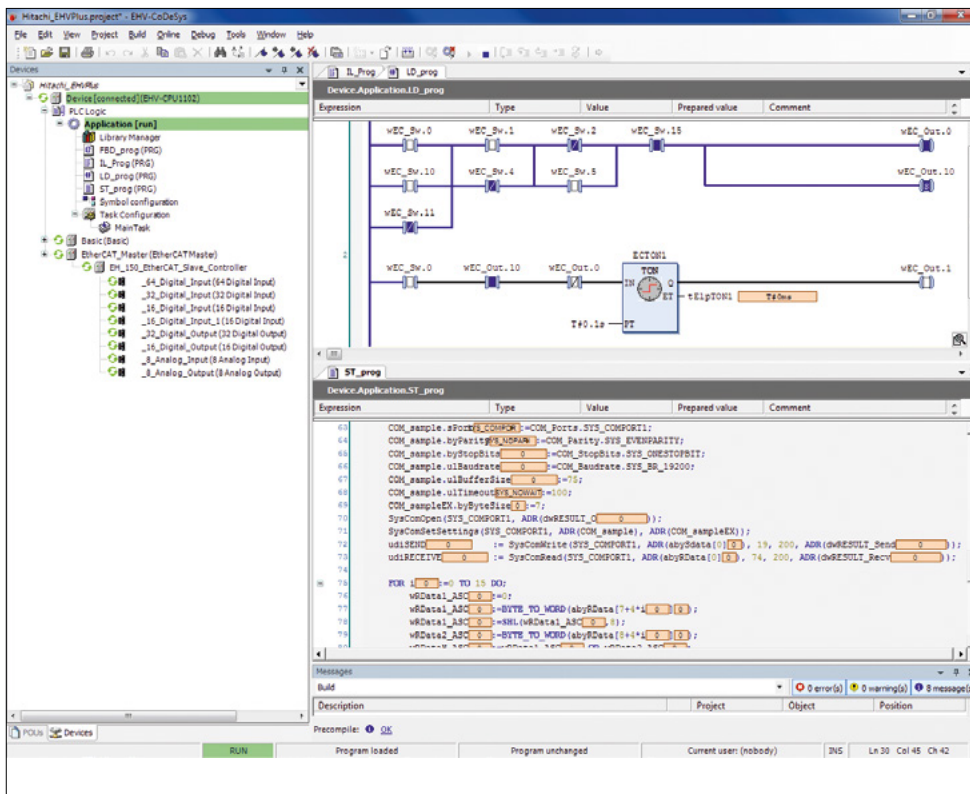

Flexible choice

Flexible choice of editors and usage of library functions considerably decreases programming time

Fast and convenient

Fast and convenient debugging/testing during commissioning

Standard Specifications

Type	EHV-CPU1025		EHV-CPU1102	
Processing speed	80 ns/instruction		80 ns/instruction	
Memory	User program (RAM)	512 kByte	2048 kByte	
	Boot project (FLASH)	512 kByte	2048 kByte	
	Source file (FLASH)	5 MByte	5 MByte	
	Data memory	384 kByte	384 kByte	
	Retain data memory	128 kByte	128 kByte	
Supported expansion bases	5		5	
Fieldbus memory	16 kByte (2 kByte x 8 units)			
Processing method	Refresh			
Programming software	HX-CODESYS (Version 3.5)			
Programming languages	LD, IL, FBD, ST, SFC, CFC (Continuous Function Chart)			
Communication port	CODESYS V3 protocol			
USB	2.0, Full speed		Programming	
Ethernet	UDP/IP, TCP/IP	Programming/General purpose/Modbus TCP Client/Modbus TCP server/EtherCAT Master/EtherNet/IP (under development)		
Serial	RS232C/422/485	General purpose/Modbus RTU Master		
User Interface	Display	RUN LED, ERR LED, 7-segment LED		
	Run switch	Remote RUN/STOP (RUN position)		
	E.CLR switch	Clear error indication in 7-segment LED		
RTC	Supported (access by RTC FB)			
Battery	Built-in (LIBAT-H)			
Approval	CE, UL, cUL, C-Tick			

HX-CODESYS

Item	Descriptions	
System requirements	RAM	1 GB
	Operating System	Windows XP/Windows Vista/Windows 7 (32-bit/64-bit)
	CPU	1 GHz Pentium
	Hard disk	1 GB
	Screen resolution	1024 x 768
Communication cables	USB	Standard USB cable (Type B connector)
	Ethernet	UTP or STP cable (cat5E)

Programming software HX-CODESYS

Thanks to full compliance to the IEC 61131-3 standard, the user can select among 6 programming languages (LD, IL, FBD, ST, SFC, CFC) in HX-CODESYS.

In addition to the PLC programming functionality, HX-CODESYS offers powerful visualisation functions such as an integrated graphical editor, which is useful for testing, commissioning or diagnostic purposes.
